

Brushed stainless steel trash bin for restaurants h2286

75 L stainless steel trash bin, mounted on wheels, with pedal opening. Ideal for food and hospital environments. Made in Italy. The stainless steel trash bin is designed for environments where hygiene and resistance are critical requirements, such as professional kitchens, hospital wards, and food laboratories. The entire stainless steel structure with a brushed finish ensures high resistance to corrosion and ease of sanitization. The design is optimized for teamwork: the wheels allow for easy movement even when fully loaded, while the pedal for opening the lid allows for hygienic hands-free use. The absence of sharp edges complies with workplace safety standards.

Technical features

- Diameter-height: 450×690 mm
