

Bubble anti-fatigue mat 60×90 cm h1043_35

Bubble anti-fatigue mat in high-resistance polyurethane, 600x900x15 mm. Matte surface, beveled edge and DIN 4102 (B1) certified fire resistance.\

The **bubble anti-fatigue mat 60×90 cm** (model h1043_35) is a professional ergonomic support designed to improve safety conditions and personnel comfort at workstations. Developed for **workshops, laboratories, packaging lines, assembly lines and service counters**, this mat is aimed at safety managers who need to preserve the health of operators forced to remain in a standing position for long periods. The system solves the operational problem of **muscular stress and circulatory fatigue in the legs**, offering a cushioned and elastic walking surface. Made entirely of high-quality polyurethane, the product is extremely resistant to daily wear and features a matte surface with a raised bubble pattern designed to stimulate blood circulation in the foot. The structure is completed by a perimeter safety beveled edge and is classified as flame retardant according to industrial standards.

Technical features

- **Geometric dimensions (WxDxH):** 60 x 90 x 1.5 cm (600 x 900 x 15 mm)
- **Construction material:** high-resistance polyurethane
- **Surface texture type:** raised bubbles
- **Visual finish:** matte surface
- **Color:** black
- **Performance index - Anti-fatigue level:** category 4 (high postural comfort)
- **Performance index - Anti-slip level:** category 3
- **Performance index - Wear and durability level:** category 5 (maximum mechanical resistance)
- **Fire safety properties:** flame retardant
- **Fire resistance certification:** complies with DIN 4102 (B1) standard
- **Fall risk prevention:** equipped with safety beveled edges around the entire perimeter
