

## Buffet refrigerated display case h24281

Refrigerated food display with plastic container. Dimensions: H.10.5 x D.33.5 x L.53.5 cm.

The **buffet refrigerated display case h24281** is an essential and functional food display, designed to guarantee the freshness of food in professional contexts such as canteens, restaurants, hotels and catering services. The structure is composed of a solid **black plastic container** that serves as a thermal base for housing **four ice elements**. On top of the base rests a **GN 1/1 stainless steel tray**, which ensures excellent cold conduction and maximum food hygiene. Thanks to its low profile, it is the ideal solution for horizontal display on buffet counters and self-service lines.

## Technical features

- **Container structure:** resistant black plastic.
- **Tray:** Gastronorm GN 1/1 format in stainless steel.
- **Cooling system:** 4 ice elements (thermal accumulators) included.
- **Total dimensions:** L. 535 x D. 335 x H. 105 mm.
- **Type:** passive refrigeration by contact and conduction.
- **Maintenance:** components easily separable for quick cleaning.
