

Buffet refrigerated display h169_41

Refrigerated display designed for use with an eutectic plate. Complete with plexiglass dome and aluminum top.

The **h169_41 buffet refrigerated display** is a professional showcase designed to combine aesthetic elegance and technical functionality in collective catering contexts such as hotels, canteens, and catering services. The structure stands out for its refined **wooden front** and an **insulated tank** that optimizes the maintenance of internal temperature. The display top is made of **aluminum**, an excellent material for thermal conduction, while food protection is entrusted to a practical transparent **plexiglass dome**. The system is designed to accommodate an eutectic plate, ensuring the freshness of the dishes throughout the service without the need for an electrical power supply.

Technical characteristics

- **Protection:** transparent plexiglass dome.
- **Aesthetics:** decorative wooden front.
- **Support surface:** high-conduction aluminum.
- **Insulation:** insulated internal tank for thermal saving.
- **Refrigeration:** designed for use with an eutectic plate (not included).
- **Total dimensions:** 580 x 365 x 220 mm.
- **Weight:** approximately 7 kg.

Optional

- **Eutectic plate:** dimensions 380 x 215 x 25 mm.
