

## Bulk material collection hopper h1004\_14

750-liter collection hopper in 4 mm sheet steel for bulk materials. 1,500 kg capacity and tipping discharge operable from the driving position.

The **750-liter bulk material collection hopper** is a solution designed for intensive use in industrial, logistical, and construction environments. Made with a robust **4 mm thick sheet steel** structure, this container solves the needs for storage and handling of bulk goods, ensuring high mechanical resistance over time. The system is optimized to speed up work cycles, allowing for controlled and safe discharge without the operator having to leave the handling vehicle.

## Technical features

- **Volumetric capacity:** 750 liters
- **External dimensions:** L. 1840 x D. 1120 x h. 550 mm
- **Maximum capacity:** 1,500 kg
- **Unladen weight:** 90 kg
- **Material:** 4 mm thick sheet steel
- **Handling:** tipping skip with discharge mechanism operable directly from the driving position
- **Certifications:** product compliant with CE marking regulations

**Options:** Upon request, it is possible to configure customized versions for specific dimensions, capacities, or applications to meet particular company layout needs.
