

Bus stop shelter with bench h28706

Bus waiting shelter made of galvanized steel tube with cantilever roof in steel sheet. Anchoring: flush with the ground.
Dimensions: 296 x 153 x h.266 cm.

Bus shelter with a simple and linear design made of Ø 90 mm galvanized steel tube uprights, at the upper ends of which are placed supports for the roof made of **shaped steel sheet** with laser technology. The roof frame consists of 40x30 mm section tubes and the roof is supported by elements in shaped sheet metal with laser technology, and infills made with composite sheet with exposed face and internal part in 0.3 mm oven-prepainted aluminum and polyethylene core. The **bus waiting shelter with cantilevered roof** is equipped with a seat consisting of two supports in shaped sheet metal with laser technology and **two exotic wood planks** section 110 x 45. The galvanized steel parts are painted with **non-toxic powders** in compliance with current regulations.

Technical features:
