

Bus waiting shelter with side walls h287_227

Bus waiting shelter with cantilevered roof and side walls. Dimensions: W.310 x D.90 x H.220 cm approx. Anchoring: flush to the ground.

The bus waiting shelter is an essential product for all inhabited centers and for areas served by public transport services. Thanks to the **cantilevered roof**, the product is indeed necessary to protect travelers from bad weather and also from direct sunlight. The shelter is made entirely of **aluminum profiles**. **The upper part is filled with transparent honeycomb polycarbonate** while the rear and side parts are **filled with transparent compact polycarbonate**. The shelter is manufactured

according to safety requirements and through the use of techniques and methodologies based on the use of non-toxic substances.

Technical features:

- Material: aluminum and polycarbonate
- Galvanized steel sheets for fixing
- Upper filling in transparent honeycomb polycarbonate 6 mm
- Rear and side filling in transparent compact polycarbonate thickness 4 mm
- Fixing: flush to the ground
- Galvanized steel bolts
- Dimensions: W.310 x D.90 x H.220 cm approx.
- Roof overall dimensions: 80 cm (cantilever) x 300
