

Canteen table h908_51

Multipurpose canteen table in steel and melamine, 200x80 cm. Ultra-robust structure with Ø60 mm legs for high-traffic collective environments.

The **h908_51 multipurpose table** is a technical solution designed for furnishing collective spaces where structural robustness is a primary requirement. With a large top (200 x 80 cm), the module is optimized to comfortably accommodate users in catering or common activity contexts, while ensuring superior stability thanks to the increased section of the vertical supports.

The load-bearing structure is based on a perimeter steel frame integrated with 60 mm diameter legs, a configuration that prevents oscillations and mechanical failure even under intensive stress. The melamine surface is selected to resist the daily cleaning cycles necessary in high-rotation environments, maintaining aesthetic and functional properties unaltered.

Technical features

- **Top dimensions:** 200 x 80 cm
- **Total height:** 76 cm
- **Structure:** Frame and legs in Ø60 mm steel tube
- **Top material:** High-resistance melamine
- **Protection:** Finish resistant to corrosion and chemical cleaning agents
- **Stability:** End feet designed for floor protection

Options available on request:

- Custom non-standard sizes
- Laminate top for superior mechanical and thermal resistance
