

## Car spring rider for public spaces h27104

Professional car-shaped spring rider in polyethylene and galvanized steel, 45x80x80 cm. Ideal for outdoor playgrounds and collective recreational areas.

The **h27104** spring rider represents a professional play solution designed for installation in public and private spaces for collective use. Thanks to its car shape with bright colors, the device stimulates children's visual skills and psychomotor activity through controlled oscillatory movement. The structure is entirely **made in Italy**, ensuring high quality standards and prolonged resistance to atmospheric agents and UV rays.

The robustness of the equipment is ensured by a base in **galvanized and painted steel**, combined with a double silhouette in **high-density polyethylene (HDPE)**. This material choice prevents color degradation and ensures reduced maintenance over time, eliminating the risk of splinters or surface corrosion.

## Technical features

- **Materials:** Galvanized-painted steel and high-density polyethylene (HDPE)
- **Configuration:** Car-shaped silhouette
- **Total dimensions:** L.45 x D.80 x h.80 cm
- **Safety area:** 2.5 x 3 m
- **Fall area:** 6.6 sqm
- **Maximum fall height (HIC):** 0.50 m
- **Certification:** Suitable for professional collective use
- **Production:** 100% Made in Italy

The equipment is supplied complete with specific metal frames for fixing in natural ground. On request, the installation service can be quoted separately.
