Steel hotel laundry trolley h21539

Professional extra-large laundry trolley in **enameled steel** with double bag holder and 3 large compartments. Equipped with an organized top shelf for courtesy sets and rubber bumpers. Dimensions: 1420x450 mm.

The **professional enameled steel trolley** is a high-capacity mobile station, designed to optimize housekeeping operations in hotels, resorts, and large accommodation facilities. The solid enameled steel structure ensures excellent stability and superior resistance to wear, making it a reliable tool for intensive transport of linen and hygiene supplies.

Organization is the strength of this model: the **3 large open compartments** allow for quick storage and retrieval of clean sheets, pillowcases, and towels. The **top shelf** is configured with 3 internal compartments, ideal for neatly separating and transporting courtesy sets (soaps, shampoos, shower caps) or cleaning detergents. For managing dirt, the trolley is equipped with **two removable side bags**, made of washable technical fabric. Safety during movement is guaranteed by perimeter **rubber bumpers**, which prevent accidental damage to walls and furniture, and by high-smoothness swivel wheels.
