

Pre-impregnation cleaning trolley h489_43

Re Use plastic cleaning trolley. With pre-impregnation system.

Cleaning trolley with **pre-impregnation** system is used in high-performance professional cleaning. It is more effective, fast and safe compared to traditional methods. The advantages of the floor cleaning method with pre-impregnated cloths are increasingly used even on smaller surfaces such as those of offices, public premises and small hotels. This is also favored by the growing awareness of the importance of hygiene in preventing bacterial or viral contamination.
