

Carrying chair with armrests h698_02

Evacuation chair with 4 wheels, footrest and armrests.

Carrying chair designed for the **transport and evacuation** of patients in elevators, stairs and in all narrow passages where a stretcher would not pass. Evacuation chair equipped with **4 wheels, footrest and armrests**. The aluminum alloy structure makes the chair light yet robust to withstand significant loads. The seat and backrest are made of sturdy, washable and disinfectable ABS. Thanks to an ergonomic lever, located at the back, the chair is easily foldable, taking up very little space. Equipped with 2 folding armrests, with anatomical handles, placed next to the folding seat. In the front part, under the seat, no. 2 telescopic (extendable) handles with anatomical grip are positioned, removable if necessary, to facilitate transport. In the rear area of the backrest, no. 4 folding handles equipped with anatomical grips are housed

Technical features:

- Open seat width: 45 cm
- Open seat depth: 46 cm
- Open height: 98 cm
- Closed dimensions: 98x50x25 cm
