FAQ:

- How many cones can the display hold?**
The display has 15 holes for vertical positioning of the cones, allowing them to be organized neatly.
- Can it accommodate cones of different sizes?**
Yes, the multi-hole design allows for inserting cones of different sizes compatible with the diameter of the holes.
- Is the plexiglass impact resistant?**
Yes, it is made with robust materials and designed for intensive professional use.
- How is the display cleaned?**
It is recommended to use a soft cloth and mild detergents to avoid scratches and maintain the material's transparency.
- Does the casket-style door have an airtight seal?**
No, the door protects the cones from dust and contamination, but it does not have an airtight seal.

Buying mini-guide:

To choose the right **ice cream cone display**, it is important to evaluate some fundamental aspects. A model with a **casket-style door** like the H412_28 guarantees greater hygienic protection compared to open displays.

The **number of holes** determines the capacity of the display: with 15 holes, this model is ideal for ice cream parlors with a medium-high flow of customers.

The **plexiglass material** is a winning choice for those seeking a product that is **resistant, transparent, and easy to clean**. Finally, it is essential to consider the **dimensions** to ensure that the display integrates perfectly with your workspace.
