

Cast iron bollard for urban furniture h744_32

Ornamental bollard in EN GJL 200 cast iron with galvanized steel core, Ø 20 cm and height 110 cm. Ideal for the aesthetic protection of historic centers.

The **H744_32 bollard** represents an urban furniture solution designed for the delimitation of pedestrian areas and the protection of public spaces. Thanks to its refined aesthetics, it solves the need to regulate vehicular access in **prestigious architectural contexts**, while ensuring high mechanical resistance and durability. The structure combines the elegance of cast iron casting with the solidity of a supporting internal core, offering a furniture element that serves as both a physical barrier and a decorative component for squares and commercial streets.

Technical features

- **External material:** EN GJL 200 cast iron casting compliant with the UNI EN 1561 standard.
- **Internal core:** Hot-dip galvanized steel tubular for total corrosion protection.
- **Dimensions:** Height above ground of 110 cm with a diameter of 20 cm.
- **Base configuration:** Octagonal shape with low-relief ornamental friezes.
- **Top:** Decorative pine cone equipped with a threaded tube for structural fastening to the internal core.
- **Fixing system:** Prepared for underground installation (approx. 20 cm below the road level) or via expansion bolts on consolidated surfaces.
- **Design:** Linear profile without side rings for greater formal sobriety.
- **Solidity:** Integrated structure that ensures permanent stability and resistance to atmospheric agents.
