

Cast iron bollard with rings for urban furniture h950_04

Urban cast iron bollard h950_04 with decorative rings. Height 77 cm, base diameter 140 mm. RAL 9005 finish for protection and street furniture.

The **urban cast iron bollard h950_04** represents a high-quality technical solution for the management and organization of public spaces. Designed to combine structural strength and architectural decor, this element allows for the effective delimitation of pedestrian areas and restricted traffic zones, preventing unauthorized vehicle access and ensuring maximum safety for pedestrians.

The structure is made of **solid cast iron**, a material chosen for its excellent mechanical inertia and ability to withstand impacts and environmental stresses. The design, characterized by the presence of ornamental rings, gives the product a classic and elegant appearance, making it ideal for integration into historic centers, squares, parks, and entrances of prestigious buildings.
