

Cast iron fountain for public parks with tap h763_34

Monumental cast iron fountain with black oxide finish, 1" push-button tap and drainage grate. Dimensions: W 38 x D 67 x H 103 cm. Weight: 91.12 kg.

The **cast iron fountain for public parks** is an urban furniture element with a classic design, designed to offer services, comfort and well-being in outdoor contexts such as promenades and green areas. This product solves the problem of water supply in open spaces, guaranteeing an extremely **durable and functional** structure that improves the daily experience of users. Made with materials resistant to intensive use, the fountain adds aesthetic and practical value to urban redevelopment projects, integrating harmoniously into historical and natural environments.
