

Cast iron gully grate with anti-theft locking h638_30

Flat ductile cast iron road gully grate with automatic closure. External dimensions: 450 x 450 mm. Height: 45 mm.

The cast iron gully grate with square frame and cover is an essential product for **collecting rainwater**, preventing it from accumulating on the road surface and **ensuring safety for drivers and pedestrians alike**. The product consists of a **square frame** equipped with an external perimeter flange, reinforcing ribs, shaped lugs on the internal edge for locking the grate closing system, grate articulation holes, and internal flanges at the four corners for housing an optional trap. **The square grate** is also equipped with a **pair of nuts and bolts** for articulation to the frame, preventing theft and tampering.

Technical features:

- Material: cast iron
- External dimensions: 550 X 550 mm
- Net opening: 450 X 450 mm
- Height: 45 mm
- Drainage: 8.79 dm²
- Weight: 24 kg
- Anti-theft locking
- Hinge
- Automatic closure
- Trappable
- Compliant with DPR 503/96

INFORMATION

- Length in millimetres 550.000000
- Depth in millimetres 550.000000
- Height in millimetres 45.000000
