Cast iron manhole cover with octagonal frame h638_72

Cast iron manhole cover with round lid Ø 600 mm. Dimensions: Ø 700x H.85 mm

Spheroidal graphite cast iron manhole cover with load class D400, suitable for roads and highways subject to the passage of cars and trucks. The structure has an **octagonal frame and round lid**. The frame is equipped with a peripheral flange with slots to ensure good anchoring to the foundation, **anti-noise and anti-tilting gasket**, eyelets to allow handling operations, and a closed-bottom hinge housing with a lid locking system in the open position. The lid is instead equipped with: a closed-bottom slot suitable for inserting the **opening and lifting key**, a locking system with a rotating latch, space for inserting any lettering, identification of the dimensions and shape of the frame, and **anti-slip reliefs for correct water flow**.

Technical features:

- Material: cast iron - GJS-500-7 – EN 1563
- Dimensions: Ø 700 x H.85 mm
- Octagonal frame
- Round lid
- Clear opening: Ø 600 mm
- Total weight: 47 kg
- Load class: D400 – certified ISO 9001:2015
- Anti-noise and anti-tilting elastomer gasket
- Opening and lifting key
- 90° block hinge
- 110° Max hinge
