

Cast iron tree grate h744_49

Cast iron grate with frame included, Ø 20 cm center hole for tree protection. Dimensions: 60 x 60 cm.

The **cast iron tree grate H744_49** is designed to protect the bases of trees in public areas, offering a robust and effective solution for **functional and durable urban furniture**. Thanks to its compact dimensions (60x60 cm) and the **inner hole Ø 20 cm**, it is ideal for young or small-diameter trees, placed in **sidewalks, squares, parks, and pedestrian areas**.

The product is entirely made of **high-quality cast iron**, a material known for its **resistance to impacts, deformation, and atmospheric agents**. This makes it perfect for outdoor environments subject to variable weather conditions and high pedestrian traffic.

The **square structure** is simple but solid, designed to integrate easily into any urban context. The **included 60x60 cm recessed frame** ensures stable installation, preventing any displacement or subsidence over time.

Intended for **public bodies, municipalities, urban planners, and companies specialized in urban furniture**, this grate represents a reliable choice for those wishing to **protect roots and the tree collar** without sacrificing the visual order of the public space.

Choose the **cast iron grate H744_49** for your urban furniture projects. Contact us now to receive a customized quote for large quantities.

Technical features:

- **External grate dimensions:** 60 x 60 cm
- **Inner hole:** Ø 20 cm
- **Perimeter frame included:** 60 x 60 cm
- **Material:** cast iron
- **Shape:** square
- **Use:** outdoors – sidewalks, parks, urban avenues

User benefits:

- **Protects:** young trees from impacts and trampling.
- **Promotes:** healthy trunk growth.
- **Ensures:** stability thanks to the included frame.
- **Resists:** over time without the need for frequent maintenance.
- **Adapts:** easily to any urban context.

FAQ:

1. Is the frame included with the product?

Yes, the supply includes the grate and the 60x60 cm recessed frame, ready for installation.

2. **Is the center hole suitable for all types of trees?**

The Ø 20 cm hole is designed for young trees or those with small-diameter trunks.

3. **Is periodic maintenance required?**

Cast iron is very resistant and does not require frequent maintenance, other than routine cleaning.

4. **What are its dimensions?**

Its dimensions are 60 x 60 cm.

5. **Is the grate square?**

Yes, the grate is square-shaped.

Mini buying guide:

To choose the **most suitable tree grate**, it is important to consider the **trunk diameter**, the **available dimensions in the urban space**, and the **level of protection required**.

Cast iron **grates** are recommended for high-traffic contexts or where long-term durability is needed.

If plant growth is expected, it is essential to select an **adequate center hole or evaluate modular grates**.

The presence of the **included frame**, as in the H744_49 model, simplifies installation and ensures greater stability.

The choice of design and material must always harmonize with the existing urban furniture to maintain aesthetic and functional consistency.
