

Cast iron tree guard h950_14

Square cast iron tree guard h950_14, powder-coated to resist atmospheric agents. Dimensions: W 125 x D 125 x h 3 cm. Weight: 76 kg.

The **cast iron tree guard h950_14** is a fundamental element for urban furniture, designed to **protect plant roots** while preserving the integrity of the surrounding soil and ensuring healthy growth. With a **square shape** and **dimensions of 125 x 125 cm**, this grate is ideal for installation in pedestrian areas, squares, and avenues, offering both functionality and an elegant aesthetic touch. **Cast iron**, a material known for its robustness and resistance, makes this grate suitable for long-lasting use over time and various weather conditions.

The **powder coating** adds an additional protective layer, increasing corrosion resistance and improving the product's durability. With a **height of only 3 cm**, the grate integrates perfectly into the ground, ensuring the safety of pedestrians and road users. The **weight of 76 kg** ensures optimal stability, reducing the risk of displacement or damage.

Choose the **cast iron tree guard h950_14** to protect your plants and enrich the aesthetics of public spaces. Join those who have already improved urban safety and design with high-quality products. **Purchase today!**

Technical characteristics:

- **Material:** cast iron
- **Coating:** powder-coated
- **Shape:** square
- **Dimensions:** W 125 x D 125 x h 3 cm
- **Weight:** 76 kg

User benefits:

- **Effective protection:** Safeguards plant roots and prevents damage to the soil.
- **Robustness and durability:** Made of cast iron for high resistance and stability.
- **Perfect integration:** Adapts harmoniously to the ground, maintaining pedestrian safety.
- **Improved urban aesthetics:** An elegant design that enriches public spaces.
- **Reduced maintenance:** Powder coating ensures long-lasting protection against the weather.

FAQ:

1. **What is the main use of the tree guard?**
The grate is designed to protect plant roots and keep the soil stable, preserving the surrounding pedestrian area.
2. **Is the grate suitable for high-traffic areas?**
Yes, thanks to its robust cast iron structure, it is ideal for areas with high pedestrian and light vehicle traffic.

3. **How is the grate maintained over time?**

A simple cleaning with water and non-aggressive detergents is sufficient to maintain the appearance and protection of the powder coating.

4. **Can it be used in any urban context?**

Yes, the grate is perfect for squares, avenues, sidewalks, and other public areas where it is necessary to protect plants.

5. **Is it weather-resistant?**

Absolutely, powder-coated cast iron offers excellent resistance to corrosion and adverse weather conditions.

Quick buying guide:

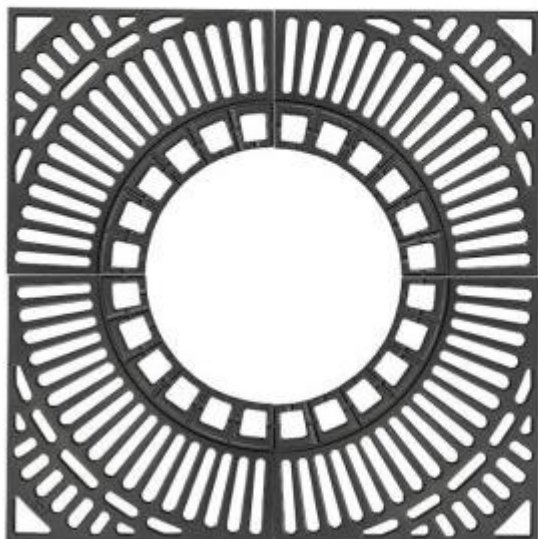

The choice of a **cast iron tree guard** is ideal for those who wish to protect plants in urban areas without compromising the aesthetics of the spaces. Before proceeding with the purchase, it is important to consider the dimensions of the installation area and the surrounding environment. The h950_14 grate offers not only protection, but also a visually pleasing and durable solution. Cast iron guarantees solidity and the powder coating provides additional protection against rust and weather. It is an optimal choice for squares, streets, and public gardens that require special attention to both functionality and appearance.
