

Ceiling acoustic panel h738_191

70x70 cm ceiling acoustic panel in recycled polyester fiber. 1.8 cm thickness, printable surface, and quick cable installation. The **H738_191 ceiling acoustic panel** is a technical solution designed for optimizing acoustic comfort in professional indoor environments. Made from **100% recycled polyester fiber**, the panel effectively reduces reverberation, improving sound clarity in shared spaces. The lightweight design and slim 1.8 cm thickness make it ideal for ceiling applications where a minimal yet high-performing aesthetic impact is required.
