

## Ceiling-mounted sound-absorbing panel with cable h738\_192

H738\_192 ceiling-mounted sound-absorbing panel in recycled polyester fiber, 100x100 cm. Installation with cables and optional custom printing.

The **H738\_192 sound-absorbing panel** is a technical solution designed for the acoustic treatment of indoor environments characterized by high reverberation. Thanks to its structure made of **100% recycled polyester fiber**, the module effectively acts on the reflection of sound waves, improving speech intelligibility and environmental comfort in offices, meeting rooms, and collective spaces. The suspended installation via **adjustable cables** allows for calibrating the panel height according to architectural needs, optimizing acoustic absorption without occupying precious wall space.

## Technical features

- **Type:** suspended sound-absorbing panel with cable attachment
- **Use:** indoor only
- **Material:** 100% recycled polyester fiber
- **Dimensions:** 1000 x 1000 mm
- **Thickness:** 1.8 cm
- **Available finishes:** Grey, Beige, Anthracite
- **Installation:** ceiling mounting via cable kit
- **Customization:** predisposed for permanent graphic printing on fabric

### Optional:

- **UV Printing:** single-sided direct printing on fabric for 100 x 100 cm panel
