

Cell phone locker h283_81

Professional smartphone storage locker with 30 compartments measuring 15x11.8 cm. 6/10 mm steel structure, double key locks, UNI certified for school environments.

The **h283_81 smartphone storage locker** is a solution designed specifically for the secure management of mobile devices in school and educational contexts. Made entirely in Italy with premium materials, it meets the needs for protection, durability, and controlled access required in high-traffic environments. Each compartment measures **15 x 11.8 cm** and allows for the tidy and protected storage of smartphones and small personal devices.

The structure is entirely made of **6/10 mm thick profiled steel, spot-welded**, ensuring robustness and stability even in environments with intensive use. The reinforced doors are equipped with **internal burglar-proof hinges with a hidden rotation pin**, offering advanced protection against tampering attempts. Security is completed by two locking options: **cylinder lock with double key** or **padlockable handle with an anti-tamper system**. Upon request, it is possible to disable the simultaneous opening of the doors for personalized management.

To facilitate quick access and periodic device checks, the cabinet allows for the **simultaneous opening of the doors**, a function particularly useful for school staff for complete inspections of the contents.

The base in **accident-prevention polypropylene** ensures resistance to impacts and intensive use. The **slots on the roof** guarantee excellent internal ventilation, preventing the overheating of stored devices. The surface is protected by **heavy iron phosphate treatment** and **acrylic painting carried out via anodic electrodeposition**, compliant with **ASTM and UNI** standards. The color is **RAL 7035 grey** for the body and doors.

Certified according to **UNI EN 16121** and **UNI EN 16122** standards for the safety and stability of non-domestic furniture, as well as **UNI 12720**, **UNI 15187**, **UNI 9227**, and **minimum environmental criteria (M.E.C.)**, the product meets the highest standards of quality and sustainability.

Technical features

- **Structure:** profiled steel, 6/10 mm thickness, spot-welded
- **Number of compartments:** 30
- **Useful dimension per compartment:** 15 x 11.8 cm
- **Overall dimensions:** 90 x 35 x 175 h cm
- **Volume:** 0.55 mc
- **Locks:** cylinder with double key or anti-tamper padlockable handle
- **Hinges:** internal burglar-proof with hidden rotation pin
- **Base:** accident-prevention polypropylene
- **Ventilation:** slots on the roof
- **Color:** RAL 7035 grey
- **Surface treatment:** heavy iron phosphate and acrylic painting via anodic electrodeposition
- **Certifications:** UNI EN 16121, UNI EN 16122, UNI 12720, UNI 15187, UNI 9227, M.E.C. (minimum environmental criteria)
