

Outdoor waste bin with wooden slats h10942

Waste bin for parks, gardens, and outdoor areas in galvanized sheet metal with pine wood slats. Complete with bag holder ring

The waste bin consists of a cylindrical container obtained from the cold rolling of **pre-galvanized sheet metal**, closed by electric welding. The upper part is flanged inwards while the bottom part is closed with a rounded base, perforated in the center to facilitate the drainage of rainwater or periodic cleaning.

Clad with **pine wood slats** of pine treated with autoclave preservative. It comes complete with a steel **bag holder ring**.

The container is fixed to the tubular steel column by means of two couplings, the upper one with a universal lock and the lower one with a screw and nut. By unlocking the lock, the **container is free to rotate for emptying and cleaning operations**. The column is closed at the top by a hemispherical sheet metal cap obtained from flat sheet turning, while the base is equipped with a flange provided with holes for ground fixing using expansion bolts.

The bin is equipped with a **lid** directly welded to the column, made of laser-cut steel sheet suitably rounded.

All metal parts are galvanized and painted with thermosetting polyester powders according to various Ral shades. All hardware supplied is made of stainless steel.

Technical features:

- Structure in **galvanized sheet metal**
- **Lid** made of steel sheet
- Bag holder **ring**
- **Height:** 1175 mm
- **Weight:** 20 kg
- **Capacity:** 38 liters

Available fixing types:

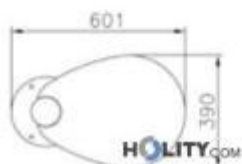

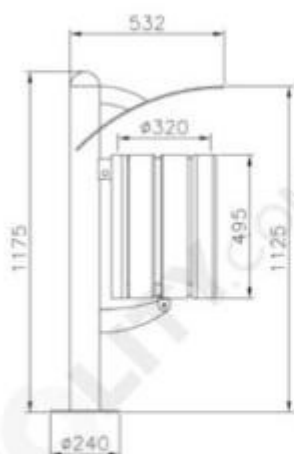

- To be buried
- To be bolted

INFORMATION

- warranty 2 anni
- punti di forza con coperchio, i più compatti
- Typology fixed
- fixing with pole
- Capacity 38 lt
