

## Outdoor waste bin with wooden slats h168119

Waste bin with galvanized steel structure covered in wood. Dimensions: h 50 cm, diameter 35cm.

The waste bin is suitable for urban furniture in parks, public gardens, squares, but also inside company or apartment building courtyards.

The structure of the bin is made of **galvanized steel**, complete with container, while the exterior is covered with **okoume wood slats**.

**The wood** is water-repellent, therefore it is not attacked by mold and woodworms, making it **long-lasting** and requiring no

specific treatments.

The waste bin is handcrafted according to ancient traditions and the components used are produced in Italy.

The product meets **safety requirements** and can freely circulate within the European Community.

The waste bin is available in two versions:

**- with floor base**

Height. 95 cm

Diameter: 35 cm

Capacity: 20 lt

**- with wall base**

Height: 50 cm

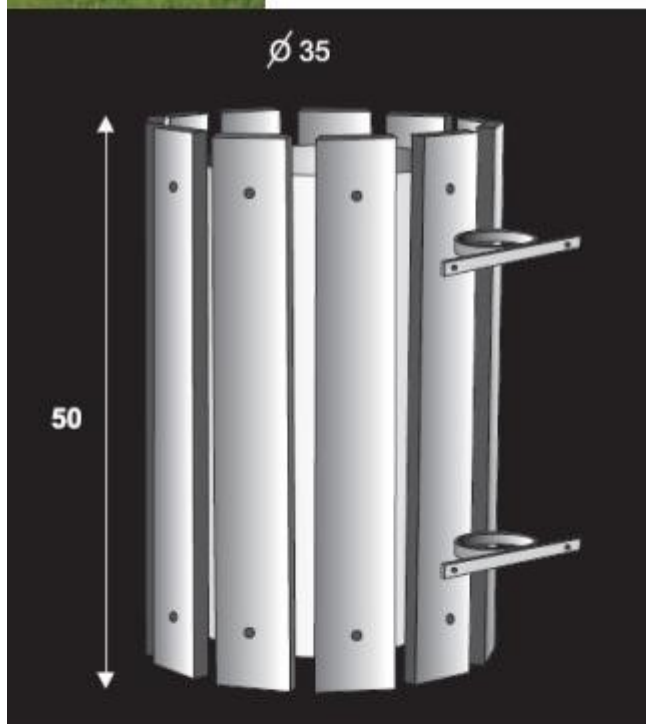

Diameter: 35 cm

Capacity: 20 lt

The metal part of the product is available in **different colors**.
