

Chair for primary and secondary school h177_58

Stackable school chair for primary and secondary school in self-extinguishing polypropylene and Ø 18 mm chrome structure. Robust and Class 1 certified.

The **H177_58 chair** represents an advanced technical solution for the furnishing of educational institutions of all levels, specifically designed to withstand the intensive daily use typical of classrooms and laboratories. The seat is made of **first-choice copolymer polypropylene**, a material selected for its mechanical resistance and added with antistatic fillers and high lightfastness pigments, guaranteeing color and structural integrity over the long term. The design integrates a **surface finish with non-slip embossing** to improve postural comfort and user stability.

Technical features

- **Seat material:** First-choice copolymer polypropylene with antistatic properties.
- **Fire certification:** Class 1 self-extinguishing approved (Italy).
- **Supporting structure:** Ø 18 mm chrome steel tube, electric-welded and cold-formed.
- **Fixing system:** 4 self-tapping screws for a solid connection between frame and shell.
- **Total dimensions:** Height approx. 81 cm; Width approx. 44 cm; Depth approx. 48 cm.
- **Seat height:** Approx. 46 cm, optimized for primary and secondary school students.
- **Ergonomics and handling:** Hole in the backrest for easy grip and ease of movement.
- **Storage:** Stackable structure for the optimization of logistical spaces.
- **Customization:** Available in different high UV resistance color variants.
