

Changing table with 2 shelves h364_73

Compact changing table h364_73 in FSC chipboard, 65x75x85 cm. Fire-retardant structure with 2 open shelves for nurseries, kindergartens, and pediatric clinics.

The **h364_73 changing table** is a professional solution designed for setting up changing areas in educational and healthcare contexts such as **nurseries, kindergartens, and pediatric clinics**. The compact structure, characterized by a height of only 85 cm, allows for optimizing space management without compromising operational ergonomics. The design is aimed at maximizing hygiene and safety, while ensuring superior resistance to the daily wear and tear typical of high-frequency environments.

Stability is guaranteed by the use of **FSC certified melamine chipboard**, treated to achieve a **Class 1 fire reaction**, a fundamental requirement for compliance with safety regulations in public buildings. The upper surface houses a **5 cm ergonomic polyurethane foam mat**, covered in flame-retardant CL1 Super-washable fabric, designed to withstand frequent sanitization cycles with neutral detergents.

Technical characteristics

- **Structure:** FSC certified melamine chipboard with anti-trauma rounded edges.
- **Fire reaction:** certified in Class 1 (CL1).
- **Dimensions:** W 65 x D 75 x H 85 cm.
- **Containment system:** safety side rails integrated into the top.
- **Changing mat:** polyurethane foam (5 cm height) with Super-washable and stain-resistant covering.
- **Storage:** 2 open shelves underneath for immediate access to hygiene supplies.
- **Maintenance:** surfaces resistant to neutral detergents and common disinfectants.
- **Supply:** product delivered disassembled with assembly kit included.
- **Warranty:** 5 years on the structure.
