

Changing table with washbasin top h621_02

Infant changing table with integrated acrylic stone washbasin. Wall-mounted installation with aluminum reinforcement legs. Shallow basin, warm surface, waterproof. For pediatric offices and playrooms.

The baby changing table is a solution dedicated to professional contexts requiring high standards of hygiene, comfort, and safety: pediatric offices, neonatal departments, playrooms, and nurseries. Designed to **facilitate diaper-changing operations** while maintaining maximum control and protection of the infant, it combines practical functionality with a sober and professional aesthetic.

The **integrated washbasin**, characterized by a limited depth of only 90 mm, allows for stable and controlled support during hygiene operations. The **changing surface is slightly sloped** to favor the natural drainage of liquids, reducing stagnation and facilitating subsequent cleaning procedures.

The **acrylic stone structure** offers superior performance in high-frequency sanitization environments: **waterproof, scratch-resistant, and resistant to humidity and mold**, it guarantees long-term durability while maintaining a **smooth surface that is warm to the touch**, a fundamental element for the baby's well-being during changing.

Installation is via **wall-mounting with support brackets and two aluminum reinforcement legs** at the front, ensuring structural stability even in intensive-use contexts. The basin can be positioned either on the right or on the left, adapting to different space configurations. Equally flexible is the placement of the tap, which can be installed on the side of the basin or directly on the wall.

Maintenance is simplified by the linear geometry without critical corners, allowing for rapid disinfection without the need for specialized tools.

Technical features

- Dimensions: L140 x D53 x H80 cm
- Material: acrylic stone
- Basin depth: 90 mm
- Installation: wall-mounting with support brackets
- Structural reinforcements: 2 aluminum legs (front)
- Basin positioning: reversible right/left
- Tap positioning: side or wall

Available optionals

- Complete system kit: up & down drain, siphon, tall chrome mixer tap
