

Charging station with QR Code h859_15

Charging station for electric bikes with racks. Payment by credit card. Dimensions: L.1180 X D.390 X H.1200 mm.

The e-bike charging station is the ideal item for furnishing urban centers in an innovative way, contributing to the fight against pollutant emissions and **favoring the spread of "green" means of transport**. The station is also suitable for outdoor areas of shopping centers and workplaces. The structure is **extremely robust** and is made of anodized steel with a galvanized steel base with provision for 4 holes for ground anchoring. The presence of a **QR Code** that can be activated by a network connection allows the sockets to be managed and activated even after payment **by credit card**.

Please take note of the comments below.

To use the station, simply follow **a few simple steps**:

1. Choice of the station to be used
2. Scanning the QR Code in reference to the socket / rack / box
3. Entering your email
4. Receipt of personal Pin code via email
5. Confirmation of the Pin code received
6. Choice of charging time to be performed
7. Display of the amount to be paid
8. Request and entry of credit card data
9. Acceptance and payment confirmation
10. Receipt of payment receipt via email
11. Automatic opening of the box door
12. Manual closing of the box door

- Differential and Magnetothermal up to 16 Ampere
- Voltage: 220V Single-phase
- Available in different colors
- Dimensions: L.1180 X D.390 X H.1200 mm

*Images purely indicative

PLEASE NOTE:

- The station must be connected to an internet network: it is possible to connect to your own WIFI service, but it is

strongly recommended - for security reasons - to opt for a SIM card (different for each station);

- SIM activation costs and related mobile network costs are at the buyer's expense;

- To collect payments the manager must register with a specific exchange platform.
