

Chemical spill kit in container h1043_57

Chemical spill kit h1043_57 in a 108 lt polypropylene container. With pads, socks and White Sorb bag. Min. absorption 110 lt.

The **chemical spill kit in container h1043_57** is an emergency response system developed to respond promptly to decontamination issues within professional and industrial environments. Developed for **safety managers, technical offices, laboratory managers, workshops, and production plants**, this set is aimed at professionals who require immediate containment measures. The product solves the main operational problem of **containing, neutralizing, and collecting accidental spills of chemicals and aggressive liquids, preventing contamination of work surfaces and preventing the runoff of harmful agents into pipes or soil**. Entirely housed inside a 108-liter polypropylene bin, the kit integrates a specific assortment of pads, cylindrical socks, and absorbent particulate in nylon and polypropylene, guaranteeing a minimum absorption capacity of 110 liters. The overall composition and geometric organization of the material are verified and visually described in the file named image_e22941.jpg.

Technical characteristics

- **Model:** FOR CHEMICALS
- **Type of system:** emergency response kit in container designed to meet decontamination issues
- **Main component materials:** polypropylene, nylon
- **Structural mass of the empty bin (Container weight):** 6.3 kg
- **Volumetric capacity of the container:** 108 lt
- **Geometric overall dimensions (L x D x H):** 650 x 500 x 570 mm
- **Minimum guaranteed absorption capacity:** 110 LT.
- **Absorbent pads equipment:** 75 PADS with dimensions 41 x 46 cm
- **Cylindrical barriers/socks equipment:** 6 SOCKS with diameter Ø 7.6 cm and length 122 cm
- **Bulk absorbent equipment:** 1 WHITE SORB BAG
- **Personal protective equipment included:** 2 GLOVES
- **Containment and collection accessories:** 3 DISPOSAL BAGS
- **Information support for emergency teams:** 1 INSTRUCTION MANUAL
