FAQ:

1. **How many cones can the display hold?**
The display has 21 holes for the vertical positioning of cones, allowing them to be organized in an orderly manner.
2. **Can it accommodate cones of different sizes?**
Yes, the design with multiple holes allows for inserting cones of various sizes compatible with the diameter of the holes.
3. **Is the plexiglass impact resistant?**
Yes, it is a robust material, designed for intensive use in professional environments.
4. **How do you clean the display?**
It is recommended to use a soft cloth and mild detergents to avoid scratches and maintain the transparency of the material.

5. Does the chest-style door have an airtight seal?

No, the door protects the cones from dust and contamination, but does not have an airtight seal.

Mini buying guide:

To choose the right **ice cream cone holder**, it is important to consider some key aspects.

A model with a **chest-style door**, like the H412_29, offers superior protection compared to open displays, ensuring **hygiene and order**.

The **number of holes** determines the capacity of the display: with 21 holes, this model is ideal for ice cream parlors with a high flow of customers.

The **plexiglass material** is the perfect choice for those looking for a product that is **resistant, easy to clean and has a professional aesthetic**. Finally, the choice of **dimensions** must be made based on the available counter space and operational needs.
