Children swing with one flat seat and one security seat h17203

Classic two-seater swing (one flat and one security seat) in Northern pine wood with galvanized steel elements. Measures: 270x400x300 cm.

This swing for two people is entirely made **of pine wood**.

Northern pine was chosen because of its high capacity to **withstand** weight pressure and atmospheric elements. This wood, in fact, unlike the one that grows at lower latitudes, it's highly **durable** and suited to outdoors constructions. Plus, this wood has been strengthened by **high pressure impregnation in autoclave**, a process that protects the material, increasing its stability and delaying its natural deterioration.

The structure of this swing is classic. Four **square** section pillars positioned in oblique and held together by a rectangular beam.

All pieces pieces are welded together via **hot-dip galvanized steel** bolts and brackets. Zinc-coating process sharpens metal natural qualities, adding others, such as rust-proof and resistance to shock and abrasion.

Just **alike** is the realization process of the chain that holds the two seats. The galvanizing process made it even **smoother**, in order to avoid any risk of scratching. The chain links are narrow enough to prevent your child's fingers to get **stuck**.

Available seats flat or wooden crate and rubber.

Specifications:

- Height: 270 cm
- Width: 400 cm
- Depth: 200 cm
- Total area: 400x470 cm
- Columns section: 9x9 cm
- Beam section: 20x10 cm
- Northern pine impregnated in autoclave
- Galvanized steel

INFORMATION

- **swing material** wood
- **swing type** double
- **Altezza in millimetri** 3000.0000
- **Larghezza in millimetri** 3500.0000
