

Children's ball pit h999_52

Folding ball pit (200x120x40 cm) in high-density foam and PVC. Safe, non-deformable and space-saving. For nurseries and schools.

The **children's ball pit h999_52** is a large and functional play-motor equipment, specifically designed for the needs of schools, nurseries and recreational centers. Designed to facilitate the work of educators and childcare workers, this pool solves the problem of space management within multifunctional classrooms. Thanks to its folding design and practical snap closure (as shown in image_7e04cb.png), it can be easily stored at the end of activities, minimizing the floor space required. Made with a non-deformable 25 kg high-density foam core and a bright-colored PVC-coated polyester covering, it guarantees the highest safety and hygiene standards, offering children a protected and stimulating environment for play and psychomotricity.

Technical features

- **Internal structure material:** High-density foam (25 kg)
- **Outer covering:** PVC-coated polyester
- **Structural properties:** Non-deformable structure, folding and equipped with snap closure (reference: image_7e04cb.png)
