

Children's bench h908_92

Solid beech wood bench for schools, without backrest and with beech plywood seat. Dimensions: W 90 x D 29 x H 31 cm.

The **children's bench without backrest h908_92**, made of **solid beech wood**, is an ideal solution for furnishing school environments, kindergartens and areas dedicated to children's activities. Designed to ensure stability, durability and freedom of movement, this bench is built with a **robust structure in solid beech** and a **plywood seat** of the same wood, renowned for its resistance and durability properties. The **backless design** is optimal for encouraging a dynamic approach to seating, encouraging children to move and interact with their peers in a natural and safe way.

The compact dimensions (**W 90 x D 29 x H 31 cm**) allow the bench to be easily positioned in various educational spaces, even adapting to small classrooms. The height of **31 cm** is specifically designed for preschool children, offering a comfortable seat that promotes correct posture and a safe, stable sitting experience. Furthermore, the **structure with pegs** not only ensures greater stability, but also adds a traditional aesthetic touch, which integrates easily into any educational context. Practical and easy to clean. Thanks to these features, it represents a reliable and lasting choice for schools that wish to invest in safe, high-quality furniture.

Discover how this **children's bench h908_92** can improve your school environment, offering practical and comfortable seating! Order it today or contact us for offers on high-quantity orders, ideal for the complete furnishing of kindergartens and nursery schools.

FAQ:

- 1. Is the bench suitable for outdoor environments?**
No, it is designed for indoor use and is not treated to resist rain and humidity.
- 2. Does the bench have a backrest?**
No, the bench is not equipped with a backrest.
- 3. What materials are used in making the bench?**
The bench is made of **solid beech wood** for the structure, while the seat is in **beech plywood**. These natural materials guarantee robustness, durability and a smooth, safe finish, free of splinters.
- 4. Does the bench contain pegs?**
Yes, the bench contains solid beech wood pegs.

Mini buying guide:

Choosing a children's bench requires attention to the quality of materials and the functionality of the design. **Solid beech wood benches** offer superior strength and stability, ensuring safe and durable use. The **backless** design is particularly suitable for educational contexts, as it allows for dynamic and flexible seating, suitable for educational activities, games and moments of socialization. Furthermore, ensure that the **dimensions** are suitable for the age of the children, with a comfortable height to facilitate correct posture. Before purchasing, also evaluate the possibility of multiple orders to best furnish each area of the educational facility and save on shipping and delivery costs.
