

Children's buffet unit h982_06

Stainless steel buffet unit for children with glass, LED, tray slide and red decorative panel. Total dimensions: L 1200 x D 700 x H 700 mm.

The **h982_06 buffet for children** is a professional unit designed for **self-service in school canteens and educational environments**, where functionality must be combined with **safety, accessibility and child-friendly design**.

With a structure **entirely in AISI 304 18/10 stainless steel**, this buffet is durable, hygienic and complies with the standards required for food use.

The **main counter** features:

- A **fully welded worktop** with a 65 mm rounded front edge for children's safety.
- **150 mm feet** that allow the height to be adjusted from 700 to 750 mm.
- **Rear opening** for storing utensils or supplies.
- **Stainless steel front** with **red decorative panel** included.

The structure is completed by:

- A **stainless steel tray slide for 3GN trays**, supplied disassembled from the self-service units. Adjustable for easy alignment.
- A **support with integrated LED lighting** and top-quality finishes. High-strength one-piece frame.
- **Tempered safety glass** to protect food hygienically, 6 GN 1/1 capacity, 2 glass panes joined by an included central clip. Includes hardware kit for installation.

The unit is ideal for displaying food **that does not require temperature maintenance**, with LED lighting that enhances presentation and improves visibility.

Make your school canteen safer and more functional! **Buy the h982_06 buffet now** or **request a custom quote for school supplies**.

FAQ:

1. Is the unit suitable for children of all ages?

Yes, thanks to the adjustable height (from 700 to 750 mm) it is ideal for nursery and primary schools.

2. Is the glass safe?

Yes, the safety glass consists of two panels joined with a central clip and chrome finishes, designed for use in school environments.

3. Is it possible to integrate heating elements into the unit?

No, this model is exclusively intended for displaying food at room temperature. For hot food, heated versions are available.

4. Is the decorative panel included?

Yes, the red panel is included.

5. Can the buffet be easily moved or repositioned?

Yes, as it is supplied in **independent dismountable modules**, it is easy to transport and relocate according to the needs of the school environment.

Quick buying guide:

When choosing a **buffet unit for school environments**, it is essential that it meets the requirements of **ergonomics, safety and hygiene**. The **h982_06** model perfectly meets these needs, thanks to a compact structure, professional materials and details designed for children.

The design includes **rounded edges, protective tempered glass, a red panel and LED lighting**, all elements that promote a safe and pleasant experience for children and operators.

Perfect for institutions wanting a **practical, educational self-service service that complies with health regulations**.
