

Children's high chair without wheels h1024_03

Children's high chair without wheels, stackable and antibacterial. Dimensions: W 63.6 x D 58.3 x H 76.8 cm

The **H1024_03 children's high chair** is the ideal choice for restaurants, bars, canteens, and hospitality facilities wanting to offer little ones a comfortable and safe dining experience. Designed to ensure **maximum stability and hygiene**, this high chair is **without wheels**, for superior safety, and is **stackable**, to optimize space when not in use.

Made of **durable plastic** and easy to clean, it is treated with **Microban® antimicrobial technology**, which **inhibits the growth of bacteria**, reducing unpleasant odors and stains over time. Unlike classic wooden high chairs, this model offers a **smooth and modern surface**, free of crevices where dirt and germs can hide.

Certified according to **ASTM F404-18 and TUV standards**, it guarantees safe seating for children during meals, with an **ergonomic design** that easily integrates into any commercial environment.

Make your business more family-friendly. Order the **H1024_03 high chair** now or request a custom quote for bulk quantities.

- **Protection:** continuous hygiene thanks to *Microban®* technology.
- **Easy:** to clean and maintain, even with intensive use.
- **Stackable:** ideal for venues with limited space.
- **Compliant:** with international safety standards.

FAQ:

1. **Is the high chair safe even without belts?**
Yes, the stable design and wheel-free structure ensure safety in catering contexts.
2. **For what age group is it suitable?**
It is designed for children who can sit up on their own (approx. 6 months – 3 years), always under supervision.
3. **How many high chairs can be stacked?**
The design allows for multiple units to be stacked, saving space in the premises.

4. Is it suitable for intensive use in public environments?

Absolutely yes. It is designed for use in restaurants, canteens, and bars, with durable and easy-to-sanitize materials.

5. Is it compliant with regulations?

Yes, the product is certified according to ASTM F404-18 and TUV, recognized standards for high chair safety.

Short buying guide:

Choosing a children's high chair for a professional context means evaluating **hygiene, safety, practicality, and space-saving**.

Plastic models with **antibacterial treatment**, such as the H1024_03, are preferable to wooden ones for **better cleaning and resistance to bacteria**.

The **absence of wheels** prevents unwanted movement, while the ability to **stack multiple units** makes it an efficient choice for high-turnover environments.

Horeca children's high chair, stackable antibacterial high chair, plastic high chair for restaurants, ASTM F404-18 certified high chair, mealtime seat for bars and canteens, children's seating for public environments.
