

Children's sandbox h364_17

Plastic sandbox for parks and kindergartens with a lid convertible into a toy car track. Dim. 91x66x42 cm. Includes play accessories.

Sandbox specifically designed for public and private play environments, intended for preschool and primary school children. It promotes the development of creativity, fine motor skills, and constructive play, fundamental elements in cognitive growth during the first years of life.

The modular structure allows for versatile use: in a standard configuration for traditional sand play, or by transforming the lid into a track for miniature vehicles, expanding the possibilities of play entertainment without resorting to additional equipment.
