

Chrome-plated medical clinic step stool h573_15

Medical clinic step stool in 18/10 stainless steel with 2 steps, non-slip base, h. 470 mm.

Specialized step stool for clinics and medical offices, designed to facilitate safe patient access to the examination table. The **18/10 stainless steel** structure guarantees total hygiene and resistance to chemical agents used in the sanitization of medical environments. The reinforced frame ensures stability and safety during use, while the supporting base made of **injected non-slip rubber** prevents accidental slips. The legs are finished with **non-slip studs** for optimal grip on the floor, even in damp environments typical of healthcare facilities.

Technical features
