

Church pew with straight seat 200 cm h1039_06

200 cm church pew in seasoned wood with straight seat and kneeler. 32 mm reinforced structure with non-slip pads.

The **church pew with straight seat 200 cm** (model h1039_06) represents a piece of artisanal cabinet-making with high resistance, designed for the furnishing of places of worship, basilicas and large liturgical halls. Specifically created for **parishes, religious communities, ecclesiastical institutes and designers of sacred interiors**, this piece of furniture is aimed at those who require structures that are durable and stable over time. The system solves the operational problem of **structural wood movements and mechanical bending** due to intensive and prolonged use, which is particularly critical on significant lengths such as two meters, thanks to an accurate process of seasoning, drying and evaporation of the raw material. The pew, characterized by a straight seat and configured with a standard size designed to optimize the passage space between rows, is assembled using finger joints and special glues that guarantee a solid single body without sagging.

Technical features

- **Overall length:** 200 cm
- **Basic configuration:** complete with straight seat and kneeler
- **Material quality:** top-quality selected wood, seasoned, dried and evaporated to avoid movement and deformation
- **Finished wood thickness:** 32 mm, unified by sanding with a calibrating machine
- **Joining technique:** finger-jointing of the boards and gluing with special high-strength glues
- **Assembly technique:** structural fastening performed with hardwood dowels
- **Structural reinforcement systems:** reinforcement crossbars positioned under the seat to avoid sagging of the seat
- **Lower stiffening systems:** side support panel under the kneeler to counteract mechanical bending
- **Available aesthetic finishes:** available in different wood finishes
- **Floor protection:** non-slip pads included at the base of the sides
- **Overall dimensions:** standard, developed beyond the space necessary for the passage between one pew and another

Optional extras available on request (subject to quotation)

- Bookrest shelf applicable to the back of the backrest
- Anatomical or semi-anatomical seat for greater postural comfort
- Personalized commemorative plaques made of brass
- Folding kneeler with folding side supports inside the pew to optimize space
- Fixed padding on seats and/or backrest covered in Cordura or Skai (synthetic leather)
- Fixed or folding padding on kneelers covered in Cordura or Skai (synthetic leather)
- Metal bag hooks applicable to the structure
