

## Circular concrete planter h319\_53

Circular reinforced concrete planter with copper aluminum band, Ø109xH67 cm. High-resistance self-standing structure for urban furniture and parks.

This planter for outdoor spaces represents a structural and decorative solution designed for professional contexts of urban furniture, public parks, and avenues. The **concrete structure** is characterized by rounded and sanded corners to prevent sharp edges, integrating an **internal reinforcement with improved adhesion** that provides stability and superior mechanical resistance. The aesthetics are enhanced by a top band in copper-colored aluminum, allowing the product to blend harmoniously into both historical and modern contexts. To facilitate logistics and installation operations, the product is equipped with pre-installed **internal hooks** for safe handling via lifting equipment.

## Technical specifications

- **Dimensions:** Ø 109 cm x H 67 cm
- **Weight:** 530 kg
- **Material:** High-resistance concrete
- **Reinforcement:** Steel with improved adhesion
- **Finish:** Rounded corners and copper-colored aluminum band
- **Handling:** Integrated internal lifting hooks
- **Geometry:** Circular
