

## City cleaning trolley h951\_02

Compact manual trolley with tool support, lockable compartment and adjustable handle. Dimensions: W 93 x D 71 x H 106 cm.

The **h951\_02 urban cleaning trolley** is the ideal solution for those looking for efficiency and practicality in the maintenance of outdoor spaces. Designed for ecological operators, municipal companies and specialized contractors, this trolley combines robustness and lightness to facilitate daily work. The structure, made of **aluminum and powder-coated galvanized steel**, offers excellent resistance to atmospheric agents, preventing rust and corrosion and ensuring long-lasting performance even in difficult weather conditions. This ensures a safe investment over time, minimizing the need for maintenance.

The trolley's intelligent design includes a **space-saving vertical support**, which allows for attaching up to **three tools** such as brooms and shovels, keeping the equipment organized and always at hand. This functionality translates into significant space savings and the ability to transport everything needed in a single solution, reducing interruptions to retrieve additional tools.

The **lockable storage compartment** is another strong point of the trolley. Ideal for keeping tools or personal items safe, it prevents loss and protects tools from theft during cleaning operations. The **height-adjustable handle** offers superior comfort of use, allowing the operator to adapt the trolley to their height and reducing the risk of muscle fatigue during prolonged use.

The large **puncture-proof wheels**, made to withstand irregular surfaces such as uneven floors, gravel or paved roads, ensure smooth maneuverability and stable transport. This allows the trolley to move easily in any urban context, improving the speed and effectiveness of the work. The presence of a **fixed waste bin, aluminum shovel, street broom, gripper for hygienic waste removal and integrated coordinated handles** allows to keep the work area clean and tidy, increasing the productivity and efficiency of the service.

Ideal for public contexts, the trolley is perfect for parks, gardens, sidewalks and squares. The combination of construction materials **aluminum for lightness and galvanized steel for robustness** gives the product an ideal balance between ease of movement and structural resistance.

Simplify and improve urban cleaning operations. Order the **h951\_02 compact manual outdoor trolley** now and discover the difference in efficiency and comfort. Contact us to request a personalized quote or for multiple orders!

### Technical characteristics:

- **Dimensions:** W 93 x D 71 x H 106 cm.
- **Structure:** Aluminum and powder-coated galvanized steel.
- **Tool holder:** Vertical support for three tools.
- **Storage compartment:** Lockable compartment.
- **Handle:** Height-adjustable for greater ergonomics.

- **Wheels:** Large and puncture-proof, suitable for uneven ground.
- **With aluminum shovel, gripper for hygienic waste removal, street broom and coordinated handles.**
- **Waste bin:** Fixed for bags and containers.

#### Benefits for the user:

- **High maneuverability** for cleaning in tight spaces.
- **Durability and resistance** thanks to high-quality materials.
- **Secure compartment** for tools.
- **Optimized ergonomics** for less physical effort.

#### FAQ:

1. **Is the trolley suitable for all types of terrain?**  
Yes, the puncture-proof wheels are designed for uneven terrain.
2. **Is it possible to adjust the height of the handle?**  
Yes, the handle is adjustable to adapt to the operator.
3. **How many tools can the trolley support?**  
Up to three tools can be attached to the vertical support.

#### Mini buying guide:

Choosing an **urban cleaning trolley** requires attention to functionality and construction quality. It is essential to evaluate the solidity of the materials and the adaptability to operational needs. Opting for a model with **tool support** and a lockable compartment offers added value in terms of practicality and safety. This **h951\_02 trolley** stands out for its ease of use and durability, thanks to the galvanized steel and aluminum components, making it an excellent choice for the regular cleaning of public spaces.
