

Cleaning trolley 50% recycled material h505_14

Professional eco-friendly cleaning trolley in Structofoam with 70L waste bin, double bucket system, and SCS-certified recycled plastic.

The **h505_14** professional cleaning trolley is a complete workstation designed to optimize sanitization and waste collection operations in high-traffic environments. Made with innovative **ReFlo** technology, the trolley integrates at least 50% high-quality recycled plastic, ensuring **SCS** certification for environmental sustainability without sacrificing the mechanical strength required in industrial settings.

The load-bearing structure is manufactured in **Structofoam**, a polymer with high resistance to impact and chemical corrosion, which ensures a long operational life even in heavy-duty environments. The washing system utilizes a **universal vertical press** (covered by a 2-year warranty), compatible with various types of mops, facilitating the transition between different cleaning methods without replacing hardware components.

Technical features

- **Structure:** Structofoam with high mechanical and chemical resistance
- **Eco-friendly technology:** ReFlo system with over 50% recycled plastic
- **Certifications:** SCS for recycled material content
- **Liquid management:** Double bucket system (17 L + 15 L)
- **Accessory storage:** 2 upper 4 L buckets for detergents and cloths
- **Collection unit:** Integrated 70 L rear waste bin
- **Wringing system:** Universal vertical press with 2-year warranty
- **Mobility:** 4 non-marking Ø 75 mm swivel wheels
- **Dimensions:** 94 x 48 x 113 cm
- **Operating weight:** 19.2 kg
