

Cleaning trolley h422_88

h422_88 hospital cleaning trolley in polypropylene. Touchless system, 20L hermetic buckets and GPP compliance for maximum sanitary hygiene.

The **h422_88** professional cleaning trolley is an advanced modular solution, specifically designed for healthcare environments where cross-contamination prevention is a priority. Made of **polypropylene copolymer**, the trolley combines a lightweight structure with high resistance to impacts and intensive use. The intelligent configuration clearly separates the waste collection area from the rest of the equipment, ensuring superior hygienic standards in critical contexts such as clinics and nursing homes.

Technical features

- **Material:** High-quality recyclable polypropylene copolymer.
- **Touchless System:** Mop head release mechanism directly into the bucket without manual contact.
- **Main Buckets Capacity:** 20 liters with hermetic sealing lid.
- **Upper Equipment:** 4-liter buckets with color-coded handles.
- **Waste Management:** Integrated bag holder with separation uprights and central ring with lid.
- **Safety:** Entirely latex-free product.
- **Sustainability:** Compliant with Green Public Procurement (GPP) criteria.
- **Ergonomics:** Compact design with handles designed for easy handling.
