

Cleaning trolley h422_96

Professional polypropylene cleaning trolley, 92x68x111 cm, with 15L double bucket system and flat wringer for deep hygiene. The professional cleaning trolley **h422_96** is an integrated solution designed to optimize sanitization operations in environments requiring high standards, such as hospitality facilities, offices, and hospital departments. The **polypropylene copolymer** supporting structure ensures high resistance to impact and the corrosive action of chemical detergents, while maintaining excellent maneuverability thanks to the ergonomic push handle integrated into the bag holder.

The washing system is based on the clear separation between the detergent solution and the rinse water through two 15-liter buckets, assisted by a flat wringer that ensures precise control of the mop moisture. The trolley also includes additional 4-liter color-coded buckets for differentiated surface cleaning, reducing the risk of cross-contamination.

Technical features

- **Material:** high-density polypropylene copolymer
- **Configuration:** bag holder with ergonomic push handle
- **Waste management:** integrated bag support
- **Washing system:** 2 x 15-liter buckets for water separation
- **Wringer:** flat model for professional mops
- **Included accessories:** color-coded 4-liter buckets
- **Dimensions:** W. 92 x D. 68 x H. 111 cm
- **Safety:** Latex-free product
