

Cleaning trolley h505_15

Professional cleaning trolley in recycled Structofoam, 4-color system, 70L waste collection and compact base for high-hygiene environments.

The **h505_15** cleaning trolley is an advanced technical solution designed to optimize sanitizing operations in professional environments that require rigor and sustainability. Thanks to its **Structofoam** structure, a high-resistance copolymer, the trolley guarantees exceptional mechanical durability and inertia to corrosive chemical agents. The system integrates **ReFlo** technology, which uses certified recycled plastic to reduce environmental impact without compromising the structural stability of the support.

This model was developed to solve issues related to **cross-contamination**: the integration of a 4-color code for the buckets allows operators to methodically separate equipment for specific areas, such as restrooms, offices, or food preparation areas. The compact configuration makes it ideal for movement in tight spaces, while ensuring a high waste management capacity thanks to the integrated unit.

Technical specifications

- **Frame material:** Structofoam (robust, lightweight, and impact-resistant copolymer)
- **ReFlo Technology:** use of high-performance recycled plastic
- **Environmental certification:** SCS (recycled material content ?50%)
- **Coding system:** 4-color code for cross-contamination prevention
- **Upper bucket equipment:** 2 x 4 liters for detergents or cloths
- **Waste collection capacity:** 70-liter integrated unit
- **Mobility system:** 4 high-smoothness 75 mm swivel castors
- **Dimensions:** 940 x 480 x 1130 mm
- **Chemical resistance:** high compatibility with main professional detergents
