

Cleaning trolley with universal press h505_16

h505_16 multi-purpose trolley in ReFlo recycled Structofoam. Includes universal press, 15/17L buckets and 70L bin for professional hygiene.

The **h505_16 cleaning trolley** represents a complete and versatile operational station, designed to meet sanitization needs in high-frequency professional environments. Thanks to the use of **ReFlo** technology, the structure integrates over 50% certified SCS recycled plastic, combining mechanical strength and environmental sustainability. The **Structofoam** frame, a high-density copolymer, guarantees superior resistance to accidental impacts and chemical aggression from industrial detergents.

The system is configured to optimize workflows: the **universal vertical press** allows working with different types of mops, while liquid management is handled by two independent buckets for water separation. The upper equipment with storage containers and the integrated bin allow carrying everything needed for surface restoration and waste collection in a single pass, improving the operator's operational efficiency.

Technical specifications

- **Structure:** High mechanical resistance Structofoam copolymer
- **Sustainability:** ReFlo system with 50% recycled plastic (SCS Certification)
- **Mopping system:** Universal vertical press with 2-year warranty
- **Lower bucket capacity:** 1 x 17 L (clean water) and 1 x 15 L (dirty water)
- **Upper storage:** 3 accessory containers of 4 L each
- **Waste management:** 70 L integrated collection unit
- **Mobility:** 4 non-marking 75 mm swivel wheels
- **Dimensions:** 94 x 48 x 113 cm
- **Compatibility:** Can be used with any type of mop (flat or string)
