

Cleaning trolley with wringer h422_89

Professional polypropylene trolley for the healthcare sector, equipped with two 15-litre buckets and a stackable frame. Ideal for GPP-compliant environments.

The professional cleaning trolley **h422_89** is an advanced technical solution designed specifically for contexts with high hygiene requirements such as hospitals, clinics, and nursing homes. The load-bearing structure is made of **polypropylene copolymer**, a material selected for its high impact resistance and total absence of porosity, facilitating the sanitisation operations of the trolley itself. Ergonomics is guaranteed by a practical handle that optimises manoeuvrability in tight spaces, while the double bucket system allows for efficient management of detergent solutions.

Technical characteristics

- **Material:** Top-quality polypropylene copolymer, shockproof and recyclable.
- **Configuration:** 2 buckets with 15-litre capacity each for water separation.
- **Wringing system:** Integrated professional plate wringer.
- **Frame:** Stackable structure for space optimisation during storage.
- **Dimensions:** W. 39 x D. 65 x h. 87 cm.
- **Safety:** Certified latex-free product.
- **Sustainability:** Compliant with Minimum Environmental Criteria (GPP) for Public Administration supplies.
