

Cleaning trolley with wringer h422_91

Professional polypropylene trolley (80x41x84 cm) with plate wringer, stackable frame and CAM compliance for healthcare and offices.

This **professional cleaning trolley** is an advanced technical solution designed for contexts requiring high hygienic and operational standards. The structure is made of top-quality **polypropylene copolymer**, a material chosen for its resistance to impacts and chemical agents. Thanks to the stackable frame and the reversible handle, the trolley optimizes storage space and facilitates maneuvers in corridors or narrow environments. The system includes two buckets and a **plate wringer**, an ideal configuration for the use of 40 cm professional mops and cloths.

Technical characteristics

- Material: High-resistance polypropylene copolymer
- Frame: Stackable structure for logistical optimization
- Maneuverability: Ergonomic reversible handle
- Washing system: Equipped with plate wringer for mop systems (40 cm)
- Dimensions: W. 80 x D. 41 x h. 84 cm
- Health safety: Latex-free product
- Environmental compliance: Meets Minimum Environmental Criteria (CAM)
