

Clearing trolley for hotels and restaurants h684_85

Clearing trolley in stainless steel and HPL for 70 settings, with 4 50x50 crate supports and integrated bag holder system for waste sorting.

The clearing trolley **h684_85** represents an advanced professional solution for managing room flows in high-turnover catering contexts. Designed to centralize the recovery of dishes, trays, and food residues, it integrates a sorting and temporary storage station into a single mobile unit. The structure is entirely made of **welded stainless steel**, guaranteeing structural stability under full load, and is finished on three sides with **HPL panels**, a material chosen for its high impact resistance and ease of sanitization.

Technical features

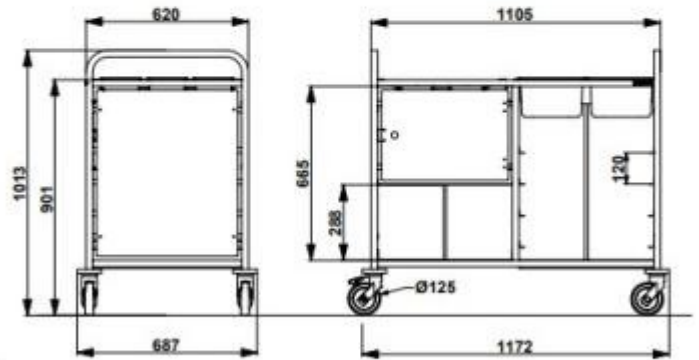

- **Operational capacity:** sized for managing clearing for up to 70 settings.
- **Collection system:** n. 2 steel wire bag holders with bag-securing elastics (total capacity 2/4 bags).
- **Accessibility:** dedicated opening door for easy bag extraction and lower stainless steel shelf for weight support.
- **Tableware organization:** n. 4 "L"-shaped supports for housing standard 50x50 mm crates.
- **Support surface:** upper stainless steel shelf specific for tray storage.
- **Load safety:** rear side equipped with anti-fall stops to prevent equipment from sliding during transport.
- **Handling:** n. 4 125 mm swivel castors in non-marking technopolymer, 2 of which are equipped with pedal brakes.
- **Certifications:** NSF-certified wheels for use in food and hospital environments.
- **Overall dimensions:** W 1172 x D 687 x H 1013 mm.
