

## Clinic screen h666\_07

2-panel folding hospital screen, steel structure, removable fire-retardant fabric, wheels, height 180 cm, for privacy in medical offices.

Modular screen designed specifically for medical and hospital environments, where **patient privacy** is an essential requirement. The solution guarantees quick and reliable visual isolation during clinical examinations, diagnostic procedures, and hospital stays. Structured with **two folding panels** that allow for flexible space adjustment, adapting to various room configurations.

The robust **steel structure** ensures stability and durability over time, while the **class M1 fire-retardant fabric panels** guarantee compliance with fire safety regulations. The textile covering is **removable**, a critical element for sanitization and cleaning operations according to hospital hygiene protocols. The **integrated wheels** allow for easy movement without requiring structural interventions.

## Technical features

- Panel dimensions: 1 x 72 cm, 1 x 75 cm
- Total height: 180 cm
- Number of sections: 2 (folding panels)
- Main structure material: steel
- Panel covering: class M1 fire-retardant fabric
- Covers: removable and washable
- Mobility system: integrated wheels
